

INSTITUTE FOR
SYSTEMS MEDICINE

www.ismedicine.org

“If people were meant to fly, they’d have wings.”

We’ve all heard the saying.

And, if those with adventurous minds had left it at that, you wouldn’t be soaring through the air right now.

At the Institute for Systems Medicine, we believe in the power of adventurous minds to translate novel ideas into pioneering research and, ultimately, into advancements in patient care.

Institute for Systems Medicine. Bringing the lab to your life.
