

We seek nothing  
less than to  
transform the  
face of medicine.

In rare moments — like when Newton's mythological apple fell or Edison's light bulb literally came on — the world shifts. And nothing that follows is ever the same. This may be such a moment.

**Institute for Systems Medicine.  
The future of medicine is here.**

---

By focusing on biological systems and their interrelationships, Spokane's Institute for Systems Medicine will translate novel ideas into pioneering laboratory research and ultimately into advancements in patient care. **Learn more at [www.ismedicine.org](http://www.ismedicine.org)**
